Professional Summary

Full Stack Developer and Freelancer with 3+ years' experience delivering scalable products in healthcare, real estate, and fashion tech. Skilled in React, Next.js, Supabase, and AWS, with strong exposure to Web3 and AI integrations. Experienced in client coordination, project planning, and mentoring teams. Adept at designing systems that improve efficiency, automate workflows, and drive measurable business results.

Experience

Freelance Full Stack Developer

Remote — 2021 – Present

Delivered 10+ production-ready apps for clients across healthcare, ERP, and AI sectors. Led requirement analysis, development, deployment, and client handovers. Managed junior devs, optimized architecture, and ensured end-to-end delivery under deadlines.

Software Intern – Quotr.io

Jul 2024 – Aug 2024

Developed automation modules and backend APIs in Node.js & Python, improving system efficiency. Enhanced UI/UX using React and Figma workflows with scalable integration layers.

Software Intern – Batwebs

May 2023 – Jul 2023

Built full-stack and mobile apps with React, Kotlin, and Flutter. Integrated APIs, optimized performance, and supported production rollouts.

Key Projects

Healthcare Management Platform

Developed a complete HMS for Ayurvedic hospitals including appointment, billing, and patient records. Improved administrative efficiency by 40% through automation and data integration. **Stack:** React, Node.js, Supabase, PostgreSQL, AWS

Fashion & Jewelry ERP (B2B/B2C)

Built a unified inventory, billing, and supplier platform for retail and wholesale operations. Enabled real-time analytics for 5K+ items and automated GST invoicing. **Stack:** Next.js, Supabase, Tailwind, AWS

Real Estate Portal

Created a property management and payment dashboard for realtors and clients with secure authentication and role-based access. **Stack:** React, Firebase, Next.js, Node.js

Web3 Domain Naming Service

Developed a decentralized naming system integrated with OpenSea and MetaMask, enabling blockchain-based domain registration. **Stack:** Solidity, React, Web3.js, JavaScript

AI Summarizer

Built a text summarization and insights engine using Hugging Face APIs and OpenStack data sources for smart content extraction. **Stack:** Python, Flask, Hugging Face, AI APIs

Technical Skills

Languages: JavaScript, Python, Java, Solidity, Kotlin, Flutter, C

Frameworks: React, Next.js, Express.js, Flutter, Spring Boot

Databases: PostgreSQL, MySQL, MongoDB, Firebase, Supabase

Cloud & Tools: AWS, Docker, Git, Postman, Figma, CI/CD

Other: Web3, AI/ML APIs, ERP Systems, REST APIs, Tailwind

Education

B.Sc (Hons) in Computer Science – RV University, Bangalore

2022 – 2026
